

## CONFÉRENCE JUSTINE ET YVES SERGENT

Only dots? Are there bars or lines?  
At what distance do they  
what security? Close to

or gray? The color? Constant intensity over the field?  
Difference between those seen in the left and

on the right much objects or view the car  
with  
Tunne  
(obj  
ph.  
it wa  
visual  
field  
viewed)  
let to  
view  
Are  
in han  
g ?

Lauréate 2005

## MARIE T. BANICH, Ph.D.

Director, Institute of Cognitive Science  
Professor, Dept. of Psychology, University of Colorado

# "A dynamic couple: The relationship between the brain's two halves helps us pay attention"

Vendredi 10 juin 2005 à 12 h

Centre de recherche  
Institut universitaire de gériatrie de Montréal  
Salle R-0715 (porte 25)  
4565, chemin Queen-Mary  
Montréal (Québec)

Pour informations : (514) 340-3540, poste 4767

Do the dots on the right much objects or view the car  
does the background in the left change with changes in  
Try short experiment - cover left eye completely;  
rule, cover the right half of the right eye.  
and off the light and ask her to tell how  
left visual field appear.

La communauté scientifique  
internationale se souvient de Justine  
et Yves Sergent comme d'un couple  
indissociable et de Justine Sergent  
comme d'une théoricienne et une  
méthodologue hors pair. Ses travaux  
sur l'organisation du cerveau pour la  
cognition commandent encore  
aujourd'hui respect et admiration.

The international scientific  
community remembers Justine  
and Yves Sergent as a devoted  
and steadfast couple, and Justine  
Sergent as an unparalleled  
theoretician and methodologist. Her  
work on the cognitive organization  
of the brain commands respect  
and admiration to this very day.
